

After 30 years of service, RTD is investing in the future of its oldest rail infrastructure! Since its inception in 1994, Denver's light rail network has been a vital part of our city's transportation system. RTD is entering the next phase of its full-depth reconstruction of the Downtown Loop, ensuring safety, mobility, and longevity for our community. The next phase includes work on the area of Kalamath Crossing to ensure a stronger, more reliable transit system. Stay up to date: <https://www.rtd-denver.com/railproject>.

IG/Twitter/Facebook: Over 30 years of light rail service into the Downtown Loop of Denver's Central Business District is ready for a makeover! We're diving into the next phase of our full-depth reconstruction on Kalamath Crossing and improving safety and reliability for many more years to come. #DowntownRailProject

RTD's longest-serving light rail network, is entering its next phase of construction on the area of Kalamath Crossing. The full-depth reconstruction process involves removing and replacing all current rail infrastructure, including concrete, ties, and ballast, to enhance safety and reliability for many years to come. #DowntownRailProject

IG/Twitter/Facebook: After 30 years, RTD is stepping up to rejuvenate our oldest rail lines, this time Kalamath Crossing - ensuring we stay safe, mobile and future-ready. Together, let's shape a stronger, more reliable transit system for our city. <https://rtdden.co/3vrity6>
